## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of claims 1-17 in the reply filed on 8/2/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### ***Information Disclosure Statement***

The lined out references cited in the filed information disclosure statements have not been considered for failing to provide a copy.

### ***Claim Objections***

Claim 10 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The recitation that the infrared radiation is directional does not further limit the parent claim since the parent claim already recites direct and indirect radiation both of which are considered directional radiation.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In Claim 1, it is unclear if the additionally recited color temperature of "preferably more than 2000K" is an optional limitation or if it is positively limiting the color temperature to more than 2000K. For examination purposes, claim 1 is being read as requiring a color temperature of more than 1500K.

Additionally, claim 1 recites a "forming" step but its unclear what it is forming. Is it the forming of glass-ceramic and/or glass parts, or is it the deformation of glass-ceramic and/or glass blank?

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1731

Claims 1, and 10 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 2 of copending Application No. 09/936,916 ('916). Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 2 of '916, like the instant claim 1, recites applying direct and indirect radiation to ceramic glass and/or glass wherein more than 50% of the total radiation output is acting indirectly onto the ceramic glass and/or glass and the color temperature is more than 1500K.

As for claim 10, direct and/or indirect radiation is deemed directional radiation.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Conclusion***
